

Transmit and Receive Microwave Links

Digital RF can provide a complete range of Microwave transmitters, receivers and amplifiers suitable for many Broadcast and Security applications.

Operating in a wide range frequency bands using COFDM Modulation each link provides high quality video and audio transmission. To ensure the best reception in difficult environments diversity is available on the receiver.

When operating with the Digital RF range of antennas the microwave links can be used for point to point outside broadcast or, utilising the compact design, covert surveillance,

Features

- A wide range of frequencies available from 300MHz up to 8GHz.
- Up to 20 selectable pre-set channels for easy operation.
- Compact transmit and receivers with a range of housings for fixed and portable applications.
- COFDM modulation with Diversity receive.
- Output powers from 100mW to 20 Watts with additional Power Amplifier.
- Antennas, Tripods and accessories available from Digital RF for a complete solution.

Miniature Transmitter for Surveillance and Specialist applications.

For Antenna requirements not listed please contact the factory.
